

CLOUD CONSULTING

M5 Systems is a provider of Information Technology solutions and services to large and small organizations since 1997. Our consulting team is among the most experienced in the business, comprised of project management experts, and IT architects. M5 provides professional services and technological expertise for all phases of the Information Technology life cycle, including business requirements and cost analysis, technology and vendor evaluation, project management, design and implementation, troubleshooting, and training. M5 has highly experienced consultants who work in a variety of vertical markets including: government, finance, education, banking, large pharma, and new media marketing startups

CLOUD SOLUTIONS

- M5 has partnered with the leading cloud provider, Amazon Web Services, which hosts 10 times more infrastructure than the next 14 competitors combined
- M5's team has several engineers that have achieved industry recognized Amazon Web Services architect certification
- M5 has completed several architecture reviews of customer networks ensuring a successful migration to Amazon AWS advising on network and security best practices
- M5 has provided assistance with evaluating whether applications are suitable for migration to the Amazon cloud, determining the appropriate AWS services to utilize, assisting with the design of cloud architectures, and working with customers on cost analysis
- M5 has provided inter-network expertise to clients seeking to privately connect to their AWS cloud. This includes all AWS connectivity options

CLOUD MIGRATION METHODOLOGY

5 Step Approach:

1. Review the customer's network, security posture and applications
2. Advise clients on how to determine if an application is an appropriate candidate for a cost effective migration to the cloud
3. Analyze potential cost (TCO) of application migration to the cloud
4. Estimate customer's network bandwidth requirement for migration to cloud and recommend the appropriate cloud connectivity options
5. Provide support through the transition to AWS, ensuring success for the project.

CLOUD VALUE PROPOSITION

- *Too many cloud choices?* Give M5 the opportunity to come in and evaluate your cloud requirements and help you make the right network and security design choices for your Amazon Virtual Data Center. This will ensure a successful and cost effective transition
- *Considering a cloud migration?* M5 can help you bridge the gap between the your in-house IT organization and your application developers to ensure a smooth and well architected migration
